

LIFELINETM
DATA CENTERS

Mainframe in the Cloud

Moving your mainframe to Lifeline's FedRAMP/HITRUST Cloud is seamless, secure and provides an immediate ROI; saving nearly 70% annually. Lifeline's solution protects the millions of dollars invested in your COBOL source code.

Founded in 2001, Lifeline Data Centers is a privately owned, debt-free company whose owners are hands-on involved in business and technology operations. Decisions are made by experienced certified data center experts, not venture capitalists or bank officers.

Lifeline's facilities are built for and used by Fortune 500 corporations, but priced within the reach of SMB users faced with arduous uptime and/or compliance requirements.

SECURE

- Industrial-strength facilities
- EMP protection (only one in USA)
- TIA-942 Rated-4 power delivery systems
- Fully compartmentalized "simple power path" power delivery systems
- Innovative, efficient, and fully redundant HVAC and electrical systems
- Hardened structures with 120 mph-rated roof systems

COMPLIANT

- FedRAMP (Federal Risk and Authorization Management Program) compliance
- Certified FISMA practitioners on staff
- ISACA certified information systems auditors on staff
- ISACA certified risk managers on staff
- Years of experience assisting customers with FISMA, IRS-1075 compliance and PCI-DSS, CJIS, ITAR, SOC2, HIPPA HITRUST CSF audit preparation
- TIA-942 certified data center designer and auditor on staff
- PCI DSS current AoC and RoC on file

SIMPLE

- Continue to leverage your COBOL investment
- Uses same COBOL code
- 2.5 times the speed of your current mainframe
- Approximately 12 month ROI
- Approximately 70% annual savings
- Increased uptime over normal mainframe operations
